

JP Drain Output Record

Dr. Shelley Perkins, Breast Surgery · (208) 706-4650

Please measure in **mL or cc**. These units of measurement are the same amount. **Please do not measure in ounces.** Strip, empty, and record each drain at breakfast, lunch, dinner, and bedtime, and record each drain separately.

A drain can come out when it has been in for at least 7 days **and** its output has been less than 30 mL in 24 hours for two days in a row. Call the clinic then, or if your drains have been in for more than 2 weeks.

Day of surgery: _____ Number of drains: _____

Day 1	Drain 1	Drain 2	Drain 3	Drain 4	Total drainage
Breakfast					
Lunch					
Dinner					
Bedtime					
Daily total:					

Day 2	Drain 1	Drain 2	Drain 3	Drain 4	Total drainage
Breakfast					
Lunch					
Dinner					
Bedtime					
Daily total:					

Day 3	Drain 1	Drain 2	Drain 3	Drain 4	Total drainage
Breakfast					
Lunch					
Dinner					
Bedtime					
Daily total:					

Day 4	Drain 1	Drain 2	Drain 3	Drain 4	Total drainage
Breakfast					
Lunch					
Dinner					
Bedtime					
Daily total:					

Day 5	Drain 1	Drain 2	Drain 3	Drain 4	Total drainage
Breakfast					
Lunch					
Dinner
